Public Notice Available on the internet at: <https://ebiznet.att.com/networkreg/>

Implementation Date: On or after March, 2018

Description of Planned Network Changes:

AT&T Michigan intends to migrate all traffic on the Grand Rapids, MI, Bell, 10T (**GDRPMIBL10T** - 114 N Division, Grand Rapids, MI 49503) Access, Local, and Choke tandem switch, to the Grand Rapids, MI, Bell, 21T (**GDRPMIBL21T** - same address) switch. The 10T switch will be powered down, and removed from service.

Existing CLLI code: **GDRPMIBL10T** Existing Point Code: 250.052.047

New CLLI code: **GDRPMIBL21T** New Point Code: 250.152.002 LATA: 348

This project will not be implemented prior to March, 2018.

Description of Reasonably Foreseeable Impact of the Planned Changes:

Interexchange Carriers, Independent LECs, Wireless Service Providers, and CLECs will be affected for current traffic routing through the **GDRPMIBL10T** switch. All existing trunking to **GDRPMIBL10T** will be eliminated. All necessary and appropriate trunk groups should be established to the **GDRPMIBL21T** switch as soon as possible. Interexchange Carriers, Independent LECs, Wireless Service Providers, and CLECs must determine if existing trunk groups to **GDRPMIBL21T** are adequate to handle the traffic, and take appropriate action by 3rd Qtr 2017, to begin the transfer of the traffic to **GDRPMIBL21T**.

Access Service Requests (ASR) or Local Service Requests (LSR) are due to be submitted on or prior to 3rd Qtr, 2017.
